Who & why?

I'm a junior/mid-weight web developer with over a year's agency experience in the UK.
I love getting my teeth stuck into a commission and exceeding a client's expectations. I work well under pressure - in fact I find it pretty motivating and I excel in what I do.

When I'm not coding:

I'm learning React and Unity in my spare time and I love VR and AR.
I love music and enjoy producing my own electronic tracks.
I love to travel - I plan to explore as much of Australia as I can!
Gardening and cooking are high up there on my geek-out list. Especially when I can combine the two!

Other useful info:

- Bilingual: [English, Spanish]

- I like peaches
